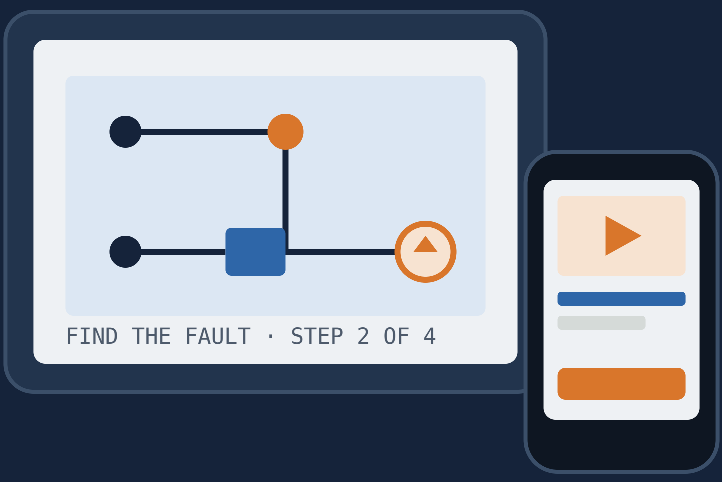
PM-SETU · PROGRAMME ONE-PAGER · [YOUR ORGANISATION]

ITI One
Faculty-first skilling

We equip every ITI instructor with simulations, videos, ready worksheets and ITI-style assessments, give every trainee a skill report and a practice app, and send all of it to the state and central dashboards without extra paperwork.

- Simulations & videos
- Worksheets
- Assessments
- Skill analysis
- Personalised learning
- Central dashboards



FIND THE FAULT · STEP 2 OF 4

1 · WHO USES IT

The programme structure, from Centre to classroom

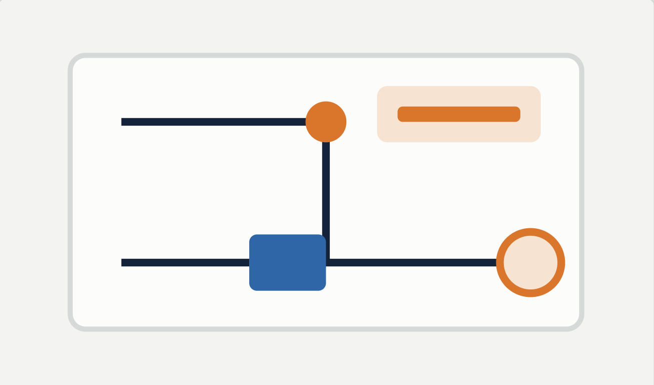
Every level gets its own view of the same data. The instructor is where learning happens, so that is where we put the most help.

- `Central` **DGT / MSDE · PM-SETU cell** — National dashboard
  Programme progress across states, hubs and trades
- `State` **Directorate of Employment & Training** — State dashboard
  District and cluster reports, generated automatically
- `Hub ITI` **Principal & administration** — Cluster dashboard
  Shared labs, instructor cover, placement cell for the spokes
- `Spoke` **Spoke ITI principals**
  Campus view: trades, batches, attendance
- `Trade` **Training Officers / Group Instructors**
  Trade view: syllabus coverage, batch skill gaps
- `Faculty` **Instructors (JTOs, craft instructors)** — Faculty toolkit + dashboard
  Teach with simulations and videos, build worksheets and assessments, see each trainee's skills
- `Learner` **Trainees** — Skill report + practice app
  Personal skill report and a mobile practice path

2 · HOW WE ASSIST FACULTY

Six tools for the instructor

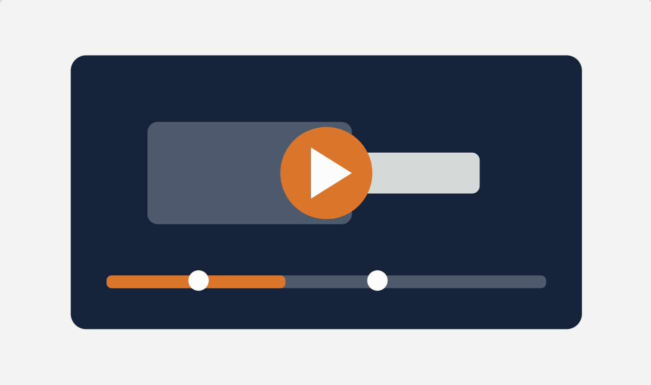
Built around DGT trade syllabi and NSQF levels, so instructors pick a topic and get ready-to-use material.



Practical simulations

Simulations & 3D animations

Safe, repeatable practice of wiring, fitting, welding and fault-finding before trainees touch the real machine.



Visual material

Short demo videos

Step-by-step videos in Telugu, Hindi and English, chaptered by task so instructors can replay one step in class.

Worksheet builder

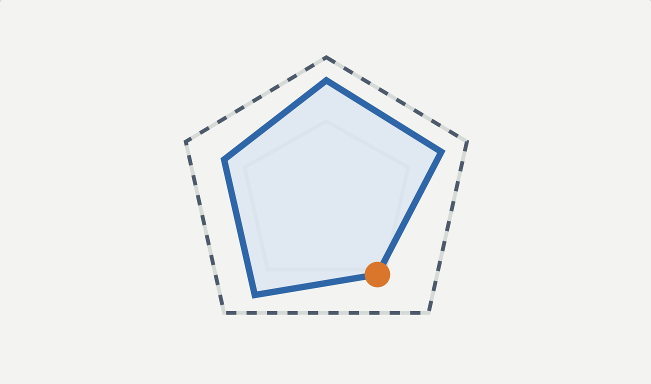
Worksheets in minutes

Pick a trade topic and get a printable or mobile worksheet with diagrams, steps and job sheets, ready to edit.

ITI-style assessments

Practical & theory tests

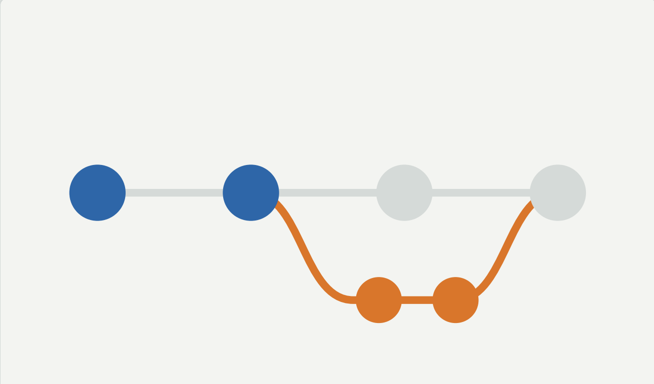
Observation checklists for workshop tasks plus question banks in the All India Trade Test pattern.



Skill analysis

See every skill gap

Each assessment updates a skill map per trainee and per batch, so instructors know who needs which step again.



Personalisation

A path for each trainee

Trainees who struggle get extra simulations and short tasks; those ahead move to advanced jobs.

3 · DASHBOARDS & PRACTICE

What faculty and trainees see

Screens shown with sample data.

`Sample data`

Faculty dashboard

Electrician · Batch B · Week 14

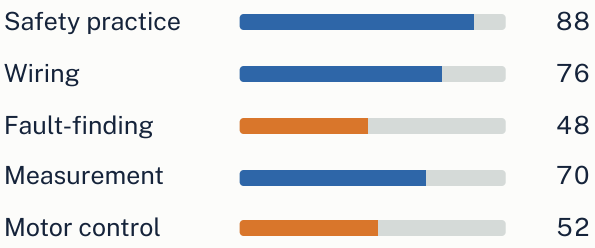
Task	Done alone	Status
Wire a DOL starter	14 of 18	On track
Find fault: board 3	9 of 18	Re-teach
Earthing test	16 of 18	On track
Motor rewinding	6 of 18	Assign simulation

Suggested: 9 trainees get the fault-finding simulation before Thursday's practical.

`Sample data`

Trainee skill report

Lakshmi D. · Electrician, year 1



Safety practice	88
Wiring	76
Fault-finding	48
Measurement	70
Motor control	52

Your next practice: 3 fault-finding simulations and one video, about 25 minutes.

Mobile practice app

Works on low-cost phones, offline

Find the fault: control panel

Step 2 of 4 · Attempt 3

4 · AUTOMATED REPORTING

Data from the workshop reaches the central dashboard on its own

CLASSROOM
Instructor teaches & assesses
Simulations, worksheets and checklists record each attempt.

ITI
Campus & hub roll-up
Batch, trade and cluster reports update daily.

STATE
DET dashboard
District and cluster comparisons, no manual returns.

CENTRE
PM-SETU dashboard
Trainees trained, skills attained, instructors upskilled.

Less paperwork for faculty

Reports come from what instructors already record in class.

Earlier help for trainees

Skill gaps show up in the same week, not at the trade test.

One version of the truth

ITI, state and Centre see the same numbers, from the same source.

Proof for PM-SETU

Progress on the 20 lakh target is measured as skills attained, not only enrolments.
